Addressing Requirements for Wireless

IPv6

Bob Hinden

ADDRESSING / IPv6

- There will soon be a large number of wireless IP Devices
    - Cellular, Bluetooth, IEEE802.11, Satellite, …..

- Wireless_mobile_always-on IP devices need global addresses

- IPv4 global addresses are being rationed today

- IPv6 has a very large number of global addresses

- Use IPv6 for Wirelesss Internetworking!

- How to bring this message to wireless forums & standards groups?
